GLADIOLUS FROM STANTHORP

J

We urge a larger planting of the choice varieties herein listed. We need more of the beautiful things of this world; and what is more beautiful than flowers, and what flower more beautiful than the gladiolus with its many forms and shapes, its endless variety of colors and markings; its usefulness as a garden ornament and its value as a cut flower for home decoration and social occasions; its cheering effect upon the sick, and its helpfulness to those who mourn a friend?

It is always a source of pleasure to have experts visit our gardens, as there are always new seedling and choice varieties that interest. Some of our visitors are thrilled with the grand formations, endless colors and shade. We pride ourselves on the large range of shades that fit in any color scheme. While we have several choice "blue" varieties this year, we are offering only one, having discarded a number generally considered good yet which fail to satisfy the average grower.

We have had our taste spoiled for the ordinary things of life. We may ride in a "flivver," yet we enjoy the luxury of a Rolls-Royce. The same with the gladiolus—the ordinary cheap varieties may be all right when worked into a floral piece by the skilled florist, but they are not comparable to the "Rolls-Royces" of the gladiolus family—the new and choice varieties that make mother and sister exclaim: "Oh, how beautiful!" Among varieties grown at "Stanthorp" are many "Rolls-Royces," at moderate price.

We all should live to extract as much pleasure as possible out of life for ourselves, our families and neighbors, and "glad" growers know that flowers give big returns in pleasure. The varieties we offer are the choicest of the best hybridizers. Among the hundreds we test each year few are added to our list unless they have some special merit. We do not want to sell a "glad" that will not please the purchaser. Our method of advertising is to have satisfied customers, and we find this the best business builder. A satisfied customer returns and brings friends. Our business is growing larger each year.

In presenting our catalog we solicit your patronage, believing that business goes where it is invited and stays where it is well treated.

Confidence placed in a person or firm must be inspired by intimate contact, personal dealings satisfied from the innermost conscience. It is getting what we expect of the other man that permits us unconsciously to repose our confidence and trust in that person.

Confidence cannot be transferred as a deed to property. Confidence is the property. It must be built from the ground up. We do not ask you to give us your confidence, we ask you to let us establish a confidence with you. Let us earn it by the motto of fair dealing, by making good our claims to being able to sell "it" to you at the right price, and having "it" true to name and in the best of condition to produce good flowers. Confidence in us will come to you through getting real values.

MARIETTA

(Metzner)

This beautiful gladiolus is a delicate shade of light salmon with pale orange tinge, lower petals frequently shading to a clear deep burnt orange, winning praise wherever shown. Large size flowers five to six inches in diameter, well placed on a straight spike. A grand variety of vigorous and clean growth. Even cormels with a little care produce flowers of larger size than the average varieties. Each \$1.00; Doz. \$10.00

STANFORD

(Metzner)

Pure dark cardinal splashed with black and covered with a velvety sheen that glistens like the sparkling dew, added to its great size—six inches in diameter, was named, by reason of its admiration by one of the faculty, in honor of California's university Stanford and its founder Leland Stanford. Large flowers and spike with splendid formation make this grand flower one of the wonders of the garden. A clean grower with healthful corms and cormels. Stands up well in sun and rain. Each \$5.00

WILLIAM G. BADGER

(Metzner)

A splendid flower with good formation, flowers often six inches or more in diameter, strong straight spike with six or seven blooms open at a time. Color is delicate light coral, edged a darker self tone; throat pale yellow with sprinkling of dark coral on lower petals. Each \$10.00

One of Gersdorff's "super glads." Rated, exhibition 93, commercial 97.

ALBANIA

(Kemp)

The color is of the purest glistening white, the flower wide open, four inches and over in diameter; petals are broad, with well-rounded tips, and the finely ruffled edges of the petals give to the individual flower an artistic finish such as seldom seen in the *Gladiolus*. The flowers are correctly placed on the spike, and set just close enough together to close up the intervening spaces, making an ideal and the best white for floral designs ever originated. Five flowers open at a time, and a splendid keeper when cut. Height, four feet; 15 to 17 flowers to the spike; very healthy, vigorous grower, and a very bountiful producer of good sound bulblets that grow. Each 30c Doz. \$3.00

ROSE ASH

(Diener) (Metzner)

A grand novelty named Rose Ash by reason of its distinctive combination of old rose tones and ashes of roses. In color, general formation of petals and growing habit it is entirely different from existing types. The rich and rare pastel colorings blend harmoniously with almost every color combination. Strong, straight, tall spikes tower like so many church steeples and growing in a fashion all its own it immediately attracts attention. The more you see of it, whether growing in the garden or displayed as a cut flower, the more its grandeur grows upon you. No collection of select gladioli should be complete without it. Each 25c; Doz. \$2.50
